ABOUT ME:

I'm a final year Information Technology student specialising in software development and web/mobile applications, with hands on experience building and deploying real world projects. I enjoy turning ideas into functional, user focused products, from Minimum Viable Product mobile apps to full-stack web applications, and thrive in collaborative environments where I can learn quickly and contribute from day one.

RELEVANT EXPERIENCE:

Developer Placement | Robotic Marketer | July 2025 - December 2025

- Collaborated within a small Agile team to design and build an interactive social media calendar, improving user experience for client content planning.
- Developed full-stack functionality using Django, MongoDB and JavaScript, including drag and drop scheduling, PDF export and CRUD operations.
- Contributed to API design and front end development, ensuring seamless integration across the platform.
- Delivered features aligned to client requirements, balancing usability with technical performance.

Freelance Web Developer | Self Employed | September 2026 - Present

- Ran client facing meetings to gather requirements, scope work and agree staged delivery and invoicing.
- Audited and migrated an existing codebase from a previous developer to client owned GitHub, Netlify and DNS.
- Set up a CI/CD workflow with branch based staging previews and automatic production deploys on merge.
- Built a data driven page fed by a client managed spreadsheet, letting non technical staff update site content themselves, with no code changes or redeploys needed.

PROJECTS:

Mobile Application Development MVP | Link to Project

- Designed interactive mockups in Figma, then built a Flutter MVP to help users discover and save study locations.
- Integrated Firebase for authentication and real time database functionality.
- Implemented device features including camera integration, and wrote unit, widget and integration tests to keep the app reliable as features were added.
- Set up a GitHub Actions CI/CD pipeline to automate builds and APK generation, delivering the app end to end from concept to deployment.

Personal Portfolio Website | Link to Project

- Designed and built a website with Next.js and Tailwind CSS, with continuous deployment via Vercel.

EDUCATION:

Bachelor of Information Technology with a double major in Software Development and Web & Mobile Application Development

- **Current WAM**: 82.105
- Macquarie University | Feb 2022 - Nov 2026 (Projected Graduation)
- Key Subjects: Algorithms & Data Structures (87), Object Oriented Programming (83), Web Technology (85), Database Design (82)

HSC - Cranbrook School | Graduated in 2021 with HSC from Cranbrook

SKILLS:

Technical Skills:

- Programming: JavaScript, TypeScript, Dart, Java, Python, SQL, HTML/CSS
- Frameworks and Tools: React, Next.js, Flutter, Firebase, Django, MongoDB, GitHub, Tailwind CSS, Figma.
- Practices: REST APIs, CI/CD (GitHub Actions), testing (unit and integration), responsive design

Core Strengths:

- Problem solving: able to break down complex problems and deliver clean, functional solutions
- Collaboration: experience working in Agile teams, contributing across front end and back end
- Learning agility: quickly pick up new tools and frameworks across projects
